OUR HERITAGE

WE'VE BEEN WRITING OUR STORY SINCE 1846.

INVENTING. INNOVATING. ALWAYS EVOLVING.

Since our earliest days, Cross has rewritten the rules for putting pen to paper.

1846

A.T. Cross Company was founded in Providence, Rhode Island by English craftsman Richard Cross, specialising in crafting beautifully ornate pencil casing in fine gold and silver.

1879

Richard's son, Alonzo Cross, invents the first propel-repel stylographic pen, the technical forerunner to today's modern ballpoint pen.

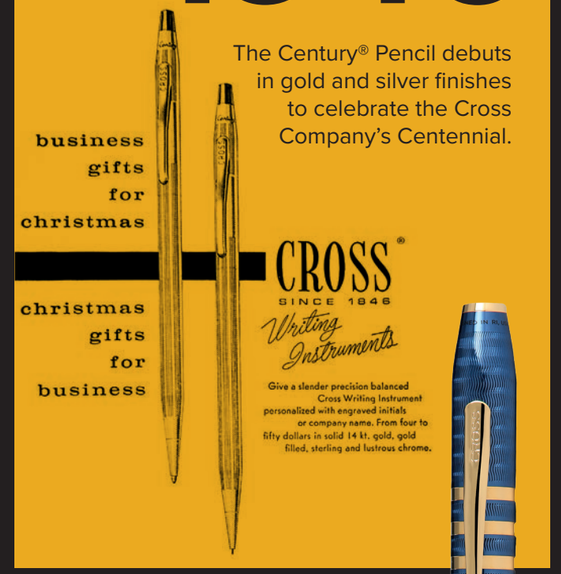

1889

The first Cross Fountain Pen debuts with the name Peerless to signify its unmatched technology and design.

1946

The Century® Pencil debuts in gold and silver finishes to celebrate the Cross Company's Centennial.

1953

The iconic Century® ballpoint pen was introduced with Ellery Boss' groundbreaking internal design patent.

Introducing a slimmer, easily replaceable ink refill.

1993

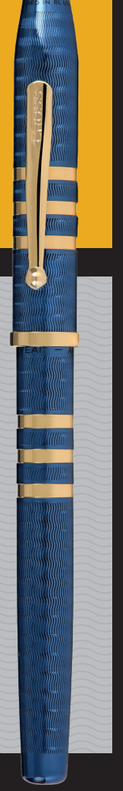

Townsend® becomes known as The Pen of Presidents, used by leaders across the globe to this day. Century® II also makes history as the pen chosen by both parties for official White House signing ceremonies.

2009

Cross becomes the first luxury maker to create a multi-function pens with the launch of its Tech Series.

2021

Cross celebrates its 175th Anniversary with a full line-up launch of heritage pens.

THE GIFT OF CHOICE FOR GENERATIONS

REFERENCE

TIP TECHNOLOGIES

Cross luxury writing instruments are available in a wide variety of tips to suit many consumers' needs.

Depending on the item, the tip technologies available are:

FOUNTAIN PEN

- One of the oldest styles of writing instruments, Fountain Pen nibs actually adapt to your own personal grip and writing style over time, creating lines on the page that — like your signature — are your own. Ink flows by capillary action from an ink reservoir to the Fountain Pen nib, which is the delicate split metal mechanism that contacts the paper. A favorite of the true connoisseur, Fountain Pen are each a work of art in their own right.
- Cross offers nibs in three widths, depending on the collection: Medium, Fine & Extra-fine
- Cross Fountain Pens support two different feed systems:
  - Cartridge, or a replaceable capsule full of ink, which is inserted into the neck of the nib.
  - Converter, which allows the writer to load liquid bottled ink and insert it into the writing instrument.

BALLPOINT PEN

- The Ballpoint is the most popular tip technology and in many ways the simplest. A Ballpoint Pen uses a small rotating ball made of carbide to disperse ink as you write. This ball acts as a buffer between the material you're writing on and the ink inside the pen. The ball rotates freely and rolls out the ink as it is continuously fed from the ink reservoir.
- Ballpoint Pens are not capped, but instead retract and store via a rotating mechanism in the barrel.
- Low maintenance and easily refillable, the Ballpoint Pen is the option for the everyday pen user.

SELECTIP® ROLLERBALL

- Our most versatile tip technology is proprietary to Cross, and is known as Selectip® Rollerball. A Selectip® allows you to "select" the kind of refill you want to use in this writing instrument from the following options:
  - Gel Rollerball (a mix of Ballpoint ease of use and the elegance of Fountain Pen ink-flow)
  - Jumbo Ballpoint (Ballpoint technology with a bolder, fuller write-out)
  - Porous-Point (most commonly known as a Flair or Marker Point)
- The inks in a rollerball are generally aqueous based. This results in a smoother, fluid (or wet) lay-down of ink similar to a Fountain Pen. Aqueous based inks, due to their fine fluidity, also tend to dry out quicker, thus care must be taken to always cap, or retract, Selectip® pens between uses.
- Unlike Ballpoint Pens, most Selectip® pens have a separate cap which prevents the ink from drying during storage.

GEL INK PEN

- The tip technology of gel ink has been rapidly gaining popularity over the past few years, and Cross now has several retractable gel ink writing instruments.
- Gel inks are generally aqueous based. This results in a smoother, fluid (or wet) lay-down of ink similar to a Fountain Pen.
- Aqueous-based inks, due to their fine fluidity, also tend to dry out quicker, thus care must be taken to always retract the tip after use.

MECHANICAL PENCIL

- Offered in 0.5mm and 0.7mm widths, depending on the product, to suit different writing preferences.
- Engineered for smooth, consistent writing.
- Produces dark, crisp lines, ideal for technical drawings, note-taking, and everyday writing.
- Break-resistant lead minimizes interruptions.
- Refillable for superior quality and longevity.
